

Cadbury Nigeria Plc

Statement on Coronavirus (COVID-19) Pandemic

The Covid-19 crisis continues to impact all businesses, with the effect expected to be more pronounced in the future. The priority for us is to protect the health, safety and welfare of our employees, customers, consumers and partners, as well as support the Government and its agencies as they work to reduce the impact of the outbreak. At this stage, it is not possible to determine the magnitude of the financial impact of Covid-19 on our Company given the lack of visibility on the end date of the pandemic. It is also not clear to us what impact this will have on the Nigerian economy. Our Company has a strong Balance Sheet and the Board and Management are focused on efforts to mitigate the overall impact on our business.
