LifePath® Target Retirement Fund - Mondelez Global TIP Plan

Investment Strategy Information
By investing in a single LifePath® Target Retirement Fund you may capture diversified investment opportunities. Rather than trying to mix and manage a collection of different funds, you only need to select one LifePath® Target Fund to access a diversified investment mix. The LifePath® Target Retirement Fund contains a blend of investments in seven major asset classes (U.S. bonds, U.S. small and large cap equities, international equities, TIPS, commodities, and global real estate).

The LifePath® Target Retirement Fund is specifically designed for participants who are close to retirement or have already retired. This means the Target Retirement Fund's investment strategy is seeking income and moderate growth of capital. The LifePath® Target Retirement Fund is designed to provide those who are withdrawing money from their plan with inflation protection. This Fund does this by holding a mix of stocks (approximately 38%, which includes real estate and commodities) and fixed income instruments.

The value of an investment will fluctuate so that your account, when redeemed, may be worth more or less than your original investment.

Performance Disclosures: Actual data for the Plan's Fund is not yet available, as the Plan's Fund inception date is expected to be September 28, 2012. It is anticipated that all assets of the Plan's Fund will be invested in the LifePath Target Retirement Fund, for which portfolio analysis and adjusted performance data is set forth above. The performance data of the LifePath Target Retirement Fund, which reflects expenses of that fund and the underlying funds in which it invests (which are 0.01%), has been adjusted to also reflect estimated annual operating expenses of the Plan's Fund, which are estimated to be 0.54%, and will decrease the performance of the Plan's Fund as compared to the performance of the LifePath Target Retirement Fund. The LifePath Target Retirement Fund invests in the following underlying funds: Russell 1000 Index Non-Lendable Fund E, Russell 2000 Index Non-Lendable E, DJ-UBS Commodity Index Daily Fund E, Developed Real Estate Index Non-Lendable Fund E, BlackRock MSCI ACWI ex-U.S. IMI Index Non-Lendable Fund E (prior to 3/01/09, EAFE Index Non-Lendable F Fund), (prior to 4/01/10, BlackRock MSCI ACWI ex-U.S. Index Non-Lendable F Fund), (prior to 3/01/09, EAFE Index Non-Lendable F Fund and Emerging Markets Non-Lendable F Fund), US Debt Index Non-Lendable Fund E, US TIPS Non-Lendable Fund E, Developed Real Estate Index Non-Lendable Fund E (added on 7/7/09), and the Dow Jones-UBS Commodity Index Daily Fund E (added on 4/1/11). All income is reinvested in the portfolios. Past performance does not guarantee future results.

Footnotes:
1 The Fund's custom benchmark tracks the performance of the underlying funds' benchmarks according to the LifePath® model allocations. The index allocations included in the custom benchmarks are quarterly to reflect the Funds' asset allocation shifts over time. The following indices may be used in such calculation: Russell 1000 Index, Russell 2000 Index, MSCI ACWI ex-U.S. IMI Index, Barclays Capital U.S. Aggregate Bond Index, Barclays Capital U.S. TIPS Index, FTSE ESPRA/NAREIT Developed Index, and the Dow Jones-UBS Commodity Index.
2 This allocation mix for the Target Retirement Fund is an approximation and is not scheduled to change; however, the Fund’s manager may decide to change the allocation in the future. Although the Target Date Retirement Fund invests in a greater concentration of lower-risk investments, a significant portion of its assets also continue to be invested in stocks to protect against inflation.
3 Benchmark performance dates back to 1/23/2009 because that is when BlackRock created the benchmark and strategy. The benchmark returns do not give effect to the Fund’s annual operating expenses. Moreover, the investment of the underlying funds held by the Fund and the weighting of the investments of the underlying funds held by the Fund may not correspond to the investments of the LifePath Retirement Custom Benchmark. So, actual performance of the Fund may differ from the benchmark performance shown due to the application of the Fund's operating expenses (which will lower the Fund’s returns) and due to any differences in investments of the Fund and the LifePath Retirement Custom Benchmark.
4 The fee ratio represents the estimated annual operating expenses for Third Quarter 2012 as a percentage of the Fund's assets.
LifePath® Target 2015 Fund - Mondelez Global TIP Plan

Investment Strategy Information
By investing in a single LifePath® Target 2015 Fund you may capture diversified investment opportunities. Rather than trying to mix and manage a collection of different funds, you only need to select one LifePath Target Fund to access a diversified investment mix. The LifePath® Target 2015 Fund contains a blend of investments in seven major asset classes (U.S. bonds, U.S. small and large cap equities, international equities, TIPS, commodities and global real estate).

The LifePath Target 2015 Fund's investment strategy is based on a retirement target year of 2015. Because the amount of time before retirement is an important factor in determining how much risk is appropriate, the timeframe left before retirement affects the asset mix for the LifePath Target 2015 Fund. With this assumption in mind, the Fund's investment strategy evolves over time as it approaches its maturity date (2015) from a greater concentration of higher-risk investments (e.g. stock funds) to a greater concentration of lower-risk investments (e.g. bond funds) while maintaining a diversified portfolio, and at its maturity date (2015) will blend into the LifePath® Target Retirement Fund. The LifePath® Target Retirement Fund is designed to provide those who are withdrawing money from their plan with inflation protection. The Target Retirement Fund does this by holding a mix of stocks (approximately 38%, which includes real estate and commodities) and fixed income instruments.

Performance Disclosures:
Actual performance data for the Plan’s Fund is not yet available, as the Plan’s Fund inception date is expected to be September 28, 2012. It is anticipated that all assets of the Plan’s Fund will be invested in the LifePath Target 2045 Fund, for which portfolio analysis and adjusted performance data is set forth above. The performance data of the LifePath Target 2045 Fund, which reflects expenses of that fund and the underlying funds in which it invests (which are 0.02%), has been adjusted to also reflect estimated annual operating expenses of the Plan’s Fund, which are estimated to be 0.54%, and will decrease the performance of the Plan’s Fund as compared to the performance of the LifePath Target 2045 Fund. The LifePath Target 2045 Fund invests in the following underlying funds: Russell 1000 Index Non-Lendable Fund E, Russell 2000 Index Non-Lendable Fund E, BlackRock MSCI ACWI ex-US IMI Index NL Fund F, Russell 1000 Index Non-Lendable Fund E, Russell 2000 Index Non-Lendable Fund E, BlackRock MSCI ACWI ex-US IMI Index NL Fund F (prior to 3/01/09, EAFE Index Non-Lendable F Fund and Emerging Markets Non-Lendable F Fund), DJ-UBS Commodity Index Daily Fund E, Russell 2000 Index Non-Lendable Fund E, and the Dow Jones-UBS Commodity Index Daily Fund E (added on 7/1/09), and the Dow Jones-UBS Commodity Index Daily Fund E (added on 4/1/11). All income is reinvested in the portfolios. Past performance does not guarantee future results.

Footnotes:
¹ The Fund’s custom benchmark tracks the performance of the underlying funds’ benchmarks according to the LifePath® model allocations. The index allocations included in the custom benchmarks are adjusted quarterly to reflect the Funds’ asset allocation shifts over time. The following index may be used in such calculation: Russell 1000 Index, Russell 2000 Index, MSCI ACWI ex-US IMI Index, Barclays Capital U.S. Aggregate Bond Index, Barclays Capital U.S. TIPS Index, FTSE ESPRA/NAREIT Developed Index, and the Dow Jones-UBS Commodity Index. The index allocations included in the custom benchmarks are adjusted quarterly to reflect the Funds’ asset allocation shifts over time.
² This allocation mix for the Target Retirement Fund is an approximation and is not scheduled to change; however, the Fund’s manager may decide to change the allocation in the future. Although the Target Date Retirement Fund invests in a greater concentration of lower-risk investments, a portion of its assets also continue to be invested in stocks to protect against inflation.
³ Benchmark performance does not give effect to the Fund’s annual operating expenses. Moreover, the investment of the underlying funds held by the Fund and the weighting of the investments of the underlying funds held by the Fund may not correspond to the investments of the LifePath Retirement Custom Benchmark. So, actual performance of the Fund may differ from the benchmark performance shown due to the application of the Fund’s operating expenses (which will lower the Fund’s returns) and due to any differences in investments of the Fund and the LifePath Retirement Custom Benchmark.
⁴ The expense ratio represents the estimated annual operating expenses for Third Quarter 2012 as a percentage of the Fund’s assets.

This document is a supplement to a prospectus covering securities that have been registered under the Securities Act of 1933.
The date of this supplement is August 31, 2012.
The LifePath Target 2050 Fund's investment strategy is based on a retirement target year of 2050. Because the amount of time before retirement is an important factor in determining how much risk is appropriate, the timeframe left before retirement affects the asset mix for the LifePath Target 2050 Fund. With this assumption in mind, the Fund's investment strategy evolves over time as it approaches its maturity date (2050) from a greater concentration of lower-risk investments (e.g. stock funds) to a greater concentration of higher-risk investments while maintaining a diversified portfolio, and at its maturity date (2050) will blend into the LifePath® Target Retirement Fund. The LifePath® Target Retirement Fund is designed to provide those who are withdrawing money from their plan with inflation protection. The Target Retirement Fund does this by holding a mix of stocks (approximately 38%, which includes real estate and commodities) and fixed income instruments.2

By investing in a single LifePath® Target 2050 Fund you may capture diversified investment opportunities. Rather than trying to mix and manage a collection of different funds, you only need to select one LifePath Target Fund to access a diversified investment mix. The LifePath® Target 2050 Fund contains a blend of investments in seven major asset classes (U.S. bonds, U.S. small and large cap equities, international equities, commodities and global real estate).

The value of an investment will fluctuate so that your account, when redeemed, may be worth more or less than your original investment.

The date of this supplement is August 31, 2012.

4 The expense ratio represents the estimated annual operating expenses for Third Quarter 2012 as a percentage of the Fund’s assets.

This document is a supplement to a prospectus covering securities that have been registered under the Securities Act of 1933. The date of this supplement is August 31, 2012.
The performance data given represents past performance and should not be considered indicative of future results. Principal value and investment return will fluctuate, so that an investor's shares when redeemed may be worth more or less than the original investment. Each Fund’s portfolio statistics change over time. The Funds are not insured by the Federal Deposit Insurance Corporation ("FDIC"), may lose value and are not guaranteed by a bank or other financial institution.

**Fund Structure**
The LifePath Target Date Funds are bank-maintained collective investment funds maintained and managed by BlackRock Institutional Trust Company, N.A. ("BTC"). BTC is a national banking association organized under the laws of the United States and operates as a limited purpose trust company.

In reliance upon an exemption from the registration requirements of the federal securities laws, investments in the Funds are not registered with the Securities and Exchange Commission ("SEC") or any state securities commission. Likewise, in reliance upon an exclusion from the definition of an investment company in the Investment Company Act of 1940, as amended (the "Company Act"), the funds are not registered with the SEC as an investment company under the Company Act. Accordingly, certain protections afforded investors in funds registered as investment companies under the Company Act (such as limitations on illiquid investments and oversight by a board of trustees comprised primarily of independent persons) are not available to investors in the Funds.

The Funds are offered to defined contribution plans ("Plans") that are qualified under Section 401(a) of the Internal Revenue Code of 1986, as amended ("IRC"), and governmental Plans, such as state and municipal government plans that are described in IRC Section 818(a)(6), such as governmental IRC Section 457(b) Plans. The Funds are established and governed by a trust instrument, the Plan of BlackRock Institutional Trust Company, N.A. Investment Funds for Employee Benefit Trusts (the "Target Funds Plan Document"), which sets forth BTC’s powers, authority and responsibilities regarding the administration, investment and operation of the Fund. Plans investing in the Funds become subject to the terms and conditions of the Target Funds Plan Document.

**Certain Investment Risks**
Investments in any of the LifePath Target Date Funds or Thrift Plan investment options are not bank deposits, are not guaranteed by any entity, are not insured by the Federal Deposit Insurance Corporation (FDIC) or any other agency of the U.S. government, and are subject to investment risks, including loss of principal.

Although LifePath Target Date Fund risks vary based on the amount of time before a LifePath Target Date Fund reaches its most conservative risk level, the key risks a Fund may be subject to are found below.

Some or all of these risks may adversely affect the value, yield and total return of units in the Funds and each Fund’s ability to meet its investment objective. There may be additional risks not identified herein that could adversely affect a Fund’s performance.

**Risks Relating to Target Date Funds:** Risks associated with investing in “target date” funds, such as BTC’s LifePath Target Date Funds, include the risk of loss of principal, including losses near, at, or after the target retirement date, and there is no guarantee that any such Fund will provide adequate income at or through an investor’s retirement.

**Equity Securities:** To the extent a Fund invests in equity securities, the Fund is subject to equity market risk, which is the possibility that common stock prices will fluctuate over short or
even extended periods. Equity securities generally have greater price volatility than fixed income securities. The market price of equity securities may rise or decrease, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries, sectors or geographic regions represented in those markets, or individual issuers. Different parts of the equity market and different types of equity securities can fluctuate separately in response to issuer, political, market and economic developments.

**Fixed Income Securities Risk:** To the extent a Fund invests in fixed income securities, it will be subject to the following risks. Fixed income securities are affected by changes in interest rates. When interest rates rise, the values of fixed income securities are likely to decrease. Conversely, when interest rates fall, the values of fixed income securities are likely to increase. The values of fixed income securities may also be affected by changes in the credit rating or financial condition of the issuing entities. In addition, there is also a risk that parties who issue securities purchased by the Fund may not be financially able to make interest or principal payments when due.

**Risks Relating to Investment in Non-U.S. Securities:** Investment in non-U.S. securities by a Fund or an underlying fund in which the Fund(s) may invest is subject to certain special risks and considerations, including potentially less liquidity and greater price volatility than investments in securities traded in the U.S. markets. Investments in securities of non-U.S. issuers are subject to all of the risks of investing in the market of such issuers, including market fluctuations caused by factors such as economic and political developments, changes in interest rates and abrupt changes in stock prices. Other risks associated with such investments include less liquid and less efficient securities markets; greater price volatility; exchange rate fluctuations and exchange controls; less publicly available information about issuers; imposition of withholding or other taxes; higher transaction and custody costs and delays in attendant settlement procedures; difficulties in enforcing contractual obligations; lower levels of regulation of the securities market; and different accounting disclosure and reporting requirements.

**Risks of Investing in Commodity Futures:** To the extent a Fund invests in commodity futures, it will be subject to the following risks. Commodity prices are generally affected by, among other factors, the cost of producing commodities, changes in consumer demand for commodities, speculative trading in commodities by commodity pools and other market participants, disruptions in commodity supply, weather, political and other global events and global economic factors. Accordingly, commodity prices can change substantially and in a rapid and unpredictable manner. Commodity futures markets are also subject to liquidity risk, and it may not, therefore, always be possible for a Fund or an underlying collective trust fund to exit an investment in commodity futures. Transactions in futures contracts involve certain risks and transaction costs. Risks include imperfect correlation between the price of the futures contract and movements in the price of the underlying index, the possible absence of a liquid secondary market for any particular instrument, the risk of default of the counterparty or guaranteeing agent, and restrictions on trading imposed by futures exchanges due to price volatility. Futures contracts involve the posting of margin deposits, and movement in the underlying index or asset may result in calls for additional payments of cash. The need to make such additional payments could require a Fund or an underlying collective trust fund to liquidate securities at a disadvantageous time.

**Risks Associated with Investing in Securities of Real Estate Companies:** To the extent a Fund invests in real estate, it will be subject to the following risks. Investing in companies that invest in real estate, such as real estate investment trusts or real estate holding companies (“Real Estate Companies”), exposes participants to the risks of owning real estate directly, as well as to risks that relate specifically to the way in which Real Estate Companies are organized and operated. Real estate is highly sensitive to general and local economic conditions and developments, and is characterized by intense competition and periodic overbuilding. Real
estate is also illiquid, and it may be difficult to sell properties in response to changes in economic or other conditions. Real Estate Companies may be highly leveraged, and may be at heightened risk of liquidation or default if they experience variations in cash flow. Real Estate Companies may also be geographically concentrated, placing them at increased risk from localized catastrophic events or changes in local economic conditions. Investments in Real Estate Companies may also be illiquid, meaning that purchases and sales of interests in a Real Estate Company may have a magnified impact on the price of such interests, resulting in abrupt or erratic price fluctuations.

**Fund-of-Funds Risk:** To achieve their investment strategy, the Funds invest their assets through one or more underlying collective trust funds. Each Fund bears the risk of the underlying funds to the extent of its investment in the underlying funds. The investment objective of an underlying fund may differ from, and an underlying fund may have different risks than, the Fund. There is no assurance that the underlying funds will achieve their investment objectives.

**Passive Investment Risk:** Fund investors will not have any control over the activities of the Funds and will not have the opportunity to evaluate the relevant economic, financial and other information which will be utilized by BTC in the selection, structuring, monitoring and disposition of investments.

**Investment and Trading Risk:** An investment in a Fund involves risks, including the risk that the entire amount invested may be lost. The Funds may invest in and trade securities and other financial instruments using investment techniques with risk characteristics, including risks arising from the volatility of the equity, convertible securities, fixed income, currency markets, the risks of borrowings and short sales, the potential illiquidity of securities and other financial instruments and the risk of loss from counterparty defaults. No guarantee or representation is made that a Fund's investment program will be successful. A Fund may utilize such investment techniques as option transactions, margin transactions, short sales, leverage and derivatives trading, which practices involve volatility and can increase the adverse impact to which a Fund's investment portfolio may be subject.

**Index Provider Information**
